After 40 years, I still have my copy of Louis Leithold's "THE CALCULUS with analytic geometry", which I purchased in September of 1971 for \$14.95. I used it for two consecutive semesters of Calculus II and III for math majors.

However, the standout text in my collection is "The Calculus 7" by Louis Leithold and I am fortunate enough to have the instructors solutions manual.

Leithold has written the best standard text at this level period. The only caveat is that this is not a text for unmotivated students who are not well prepared in Precalculus

Leithold's The Calculus is by far the best textbook on the subject. It shows plenty of examples, it gives proofs for everything that is discussed. I've took calculus in the early 80's, and when ever I need to review some calculus, there is nothing that comes close to Leithold for explaining and
