Buildings, Construction: 2 ...

A Pattern Language I have just finished reading Christopher Alexander ‘s A Pattern Language: Towns – Buildings – Construction, one of the most wonderful books I have read in years. The scope of the book is incredible. It sets out, in plain terms, to empower people to design, build and shape their own

surroundings.

Christopher Alexander’s “A Pattern Language” – Medium Massage

thousand pages (I think,) "A Pattern Language" is an encyclopedic study of what makes buildings, streets, and communities work -- indeed, what makes environments human.Alexander and his

co-authors present us with over two hundred (roughly 250) "patterns" that they believe must be

Pattern Language

Christopher Alexander, an architect and author, coined the term pattern language. He used it to refer to common problems of the design and construction of buildings and towns and how they should be solved.

Pattern language - Wikipedia

Cornell | ARL

Cornell | ARL

Towns and buildings will not be able to become alive, unless they are made by all the people in society, and unless these people share a common pattern language, within which to make these

buildings, and unless this common pattern language is alive itself.
