The General Data Protection Regulation (GDPR) is a regulation in EU law on data protection and privacy in the European Union (EU) and the European Economic Area (EEA). It also addresses the transfer of personal data outside the EU and EEA areas.

### General Data Protection Regulation - Wikipedia

Though for many years privacy by design was considered best practice, it was never a formal legal requirement. Until the GDPR, Article 25 of the GDPR introduces a legal requirement to implement privacy by design and “bake” privacy into product development and organizational processes. So why is our approach to this topic flawed?

### Privacy by design — GDPR's sleeping giant

The main focus of the GDPR is the protection of personal data and digital privacy. The GDPR significantly tightens existing rules on data handling, placing greater obligations on organizations that handle data. The GDPR also sets out guidance for organizations on appropriate levels of data security.
