The terms in A to Z GIS are alphabetized letter by letter, according to lexicographical tradition. Spaces and hyphens between words are ignored. For example, baseline, basemap, and base station appear in that order. (A word by word alphabetization would place them in the following order: base station, baseline, basemap). The letter

The Zhuxi deposit is the largest copper-tungsten polymetallic deposit in the world and is in Jiangxi Province in South China. The ore body is characterized by hydrothermal-vein deposits of copper, lead, and zinc minerals at shallow levels, skarn deposits of tungsten and copper minerals at middle levels, and altered-granite-hosted copper and tungsten minerals at depth.

1. Introduction. Methane (CH<sub>4</sub>) is the second significant long-lived greenhouse gas (GHG), which is less abundant than carbon dioxide (CO<sub>2</sub>), but with a global warming potential over a period of 100 years 34 times more potent than CO<sub>2</sub> (Baldocchi et al., 2012; IPCC, 2014). Due to increased emission from anthropogenic sources since industrial revolution, atmospheric CH<sub>4</sub> was 257% of the pre ...
