Any air conditioning unit has filters that clean the air from dust, odors, microorganisms etc. However, the current needs of comfort and hygiene are leading some manufactures to supply the units with ionizer also. The ionizer is an additional filters currently the one of the most advanced air-cleaning technologies in the world (COLD PLASMA).

What does the ionizer in an AC unit and why should I ...

An air ioniser (or negative ion generator or Chizhevsky's chandelier) is a device that uses high voltage to ionise (electrically charge) air molecules. Negative ions, or anions, are particles with one or more extra electrons, conferring a net negative charge to the particle.

An ion (/ ' aɪ ɒ n, -ən /) is an atom or molecule that has a net electrical charge. Since the charge of the electron (considered negative by convention) is equal and opposite to that of the proton (considered positive by convention), the net charge of an ion is non-zero due to its total number of electrons being unequal to its total number of protons. A cation is a positively charged ion ...

The 7000 series needlepoint air ion generators are commercial quality units intended for installation in air handling units (AHU), furnaces, or duct systems for commercial applications. The number of units and the quantity of the ionization outlets are dependent on the airflow in the system and the severity of the indoor air pollution problem.
