The end product of this webquest will be the creation of a "web report" detailing the causes and effects of acid rain. Each "scientist" will be responsible for his/her section of the report while the recommendations and conclusions will be arrived at through the cooperative efforts of the entire group that you are working with.

Acid Rain Webquest - Chemistry - Google Sites

Acid rain is a general term used to describe different kinds of acidic air pollution. Although some acidic air pollutants return directly back to Earth, a lot of it returns in rain, snow, sleet, hail, mist or fog, which is why we call it acid rain . Acid rain can have harmful impacts on the ecosystems in the environment.
