## **The Future of Healthcare | DPR Construction**

By Elizabeth O'Dowd. July 03, 2017 - AMIA launched a new public education plan earlier this month to emphasize the importance of healthcare informatics and the need for HIT infrastructure to support it. The program aims to address the growing demand for knowledge in healthcare as the amount of data available for informatics continues to rise.

## **Healthcare Informatics Encourage Advanced HIT Infrastructure**

EHRs, EMRs, personal health record (PHR), medical practice management software (MPM), and many other healthcare data components collectively have the potential to improve the quality, service efficiency, and costs of healthcare along with the reduction of medical errors.

## **Big data in healthcare: management, analysis and future ...**

The future of health will likely be driven by digital transformation enabled by radically interoperable data and open, secure platforms. Health is likely to revolve around sustaining well-being rather than responding to illness. Twenty years from now, cancer and diabetes could join polio as defeated diseases.
