Project Finance (13) Sources of project financing will depend on the structuring of the project (which is heavily impacted by project risks). There are many financial products in the market to pay for construction costs. The cost (interest rates and fees) of each financial product will depend on the type of asset and risk profile.

Sources of Project Financing - Wall Street Prep

As today's most advanced project finance risk system, the SFS has been adapted for various types of project finance ventures. At Risk Integrated, we understand that banks often want to use their own risk models as well as those from third parties. The modular structure of the SFS was designed to allow multiple types of cashflow models to be embedded in a single consistent framework to work with our risk engine. We currently offer risk models for a variety of projects, such as: Oil, gas and ...

Specific risks in financing a downstream project Key risks faced by any downstream project include the following. Feedstock supply risk Ultimate revenue streams for the project life and relevant financing tenor depend on the security of supply of the raw oil and natural gas products (feedstock) to the project.

Financing options in the oil and gas industry

Risk identification and allocation is a key component of project finance. A project may be subject to a number of technical, environmental, economic and political risks, particularly in developing countries and emerging markets. Financial institutions and project sponsors may conclude that the risks inherent in project development and operation are unacceptable (unfinanceable). "Several long-term contracts such as construction, supply, off-take and concession agreements, along with a variety ...
