An Economic Theory Of Democracy

An Economic Theory of Democracy is a treatise of economics written by Anthony Downs, published in 1957. The book set forth a model with precise conditions under which economic theory could be applied to non-market political decision-making. It also suggested areas of empirical research that could be tested to confirm the validity of his conclusions in the model. Much of this offshoot research eventually became integrated into the Public Choice School. Downs' theory abstains from making normative

Anthony Downs's Economic Theory of Democracy has been marginalized in normative democratic theory, notwithstanding its prominence in positive political theory. For normative theorists, the "paradox of voting" testifies to the reality of moral motivation in politics, a species of motivation foreign to Downs's theory and central to the ideals of deliberative democracy that normative theorists developed in the 1980s and 1990s.
