### appellate courts structures functions processes and personnel

The 94 federal judicial districts are organized into 12 regional circuits, each of which has a court of appeals. The appellate court's task is to determine whether or not the law was applied correctly in the trial court. Appeals courts consist of three judges and do not use a jury. A court of appeals hears challenges to district court decisions from courts located within its circuit, as well as appeals from decisions of federal administrative agencies.

### Court Structure | NYCOURTS.GOV

Appellate review performs several functions, including correcting errors committed by a trial court, developing the law, and achieving uniformity across courts. Appellate procedure focuses on several main themes: what judgments are appealable, how appeals are brought before the court, what will be required for a reversal of the lower court (such as a showing of "abuse of discretion or "clear error"), and what procedures parties must follow.
