Bodies : sex, violence, disease, and death in contemporary ...

Nearly one in five women and one in 71 men report being raped at some point in their lives, according to the Center for Disease Control. Given the shame and other complexities that keep many victims from reporting the crimes, these numbers are likely lowball—and don't include other kinds of sexual violence, such as unwanted sexual touch. Along with other challenging and potentially debilitating effects of sexual assault comes a high risk for poor body image, disordered eating and full ...
