Our Technology - Community Care Physicians P.C.

HEQ explores technology solutions for health and elderly care.. According to figures produced by the World Health Organization (WHO), 20% of the world's population will be over the age of 60 by 2050. The WHO predicts the number of people older than 80 will triple between 2019 and 2050, rising from 143 million to 426 million.

Community health, elderly care, and technology

A new survey of over 600 professional nurses found that 82% agree that new technology and equipment innovation will positively impact patient care. As more of the population ages, as life expectancy increases, and as the nursing shortage continues, these new medical technologies are crucial for continued patient care, and the health

7 Nursing Technologies Transforming Patient Care

Between 2010 and 2050, the senior population is expected to reach 88.5 million, or 20 percent of the U.S. population, greatly increasing the need for senior care. Home health care will then become an even more significant element of the continuum of care. As our elderly population increases, it will require higher levels of health care that are more affordable and can be delivered at home.
