Computability Theory (Chapters 1-8) Chapter 1 1.1 The converse assertion then follows from the first assertion by applying it to f -1 and its inverse f -1-1. 1.3 For (a) consider the identity function i(a) = a for all a in A. For (b) and (c) use the preceding two problems, as per the general hint above. 1.5 Show both sets are denumerable.
