### Biology Lab || Crayfish Dissection - YouTube

In this lab, you will observe the external structures of a crayfish and dissect it to study its internal structures and systems. Background: Like all crustaceans, a crayfish has a fairly hard exoskeleton that covers its body. As shown in the diagram on the next page, its body is divided into two main parts, the cephalothorax and the abdomen.

### Crayfish Dissection - BIOLOGY JUNCTION

1. Place the crayfish on its side in the dissection tray. Use the diagrams above to locate the cephalothorax and the abdomen. The carapace, a shield of chitin, covers the dorsal surface of the cephalothorax. On the carapace, locate the indentation known as the cervical groove .
