PHIL102: Introduction to Critical Thinking and Logic ...

Critical thinking is thinking done with depth, clarity, logic, and precision. It attempts to connect patterns of information into patterns of thought, either to solve a problem, generate ideas, or come up with creative concepts. When thinking critically, viewpoints are examined, as well as the biases, data, and concepts driving the viewpoints.

Syllabus for my Creative Thinking Course | Scott Berkun

Creative thinking is a way of looking at problems or situations from a fresh perspective to conceive of something new or original. Critical thinking is the logical, sequential disciplined process of rationalizing, analyzing, evaluating, and interpreting information to make informed judgments and/or decisions.
