Caring for Deaf and Hard of Hearing Patients Deaf and hard of hearing (DHH) encounter a variety of health care barriers, notably access, communication and even language barriers. Thus, they struggle with worse health outcomes and lower health care satisfaction (see list of publications below).

Caring for Deaf and Hard of Hearing Patients

Deaf, hard of hearing, and DeafBlind Americans who seek medical treatment amid the COVID-19 crisis and medical professionals serving them may encounter significant barriers to communication. We estimate that up to approximately 650,000 Americans who are deaf, hard of hearing, or DeafBlind may go to the hospital for COVID-19 treatment. This population will be particularly vulnerable if large numbers of infected patients present simultaneously and overwhelm hospitals, creating a medical ...
