Electrical Troubleshooting Lights that Flicker or Dim

Connecting a two-wire light fixture to a three-wire power supply cable is not an ordinary occurrence. Three wire supply cables generally carry red and black hot wires of 110- to 120-volts each with a single white neutral wire. The lighting could be added to the three-wire cable provided that the circuit breaker is no more than 15-amps and the wire size is no greater than 14-gauge.

How to Attach a Two-Wire Lighting Fixture to a Three-Wire ...

Light fixtures in wet/exposed areas must be listed for use in wet locations. Light fixtures in damp areas (protected by an overhanging eave or roof) must be listed for damp locations. Surface-mounted electrical boxes for all electrical fixtures must be raintight/weatherproof. Exterior light fixtures do not require GFCI protection.

National Electrical Code (NEC) Rules for Outdoor Wiring

When wiring a house, it's always a good idea to put lights and outlets on separate circuits, which guarantees that if the outlet circuit fails, you still have light. As long as you don't put too many lights on the light circuit, you can usually control that circuit with a 15-amp breaker, as well as wire it with a 14-gauge wire.

What Gauge Wire Should I Use for Lights and Outlets? | Hunker

The purpose of a red wire for wiring a light fixture varies, but is easily determined in most cases. National Electrical Code The NEC reserves certain wire colors for specific purposes.
