Flora Of Tropical East Africa

Flora of East Tropical Africa is the largest regional tropical flora ever created. Documenting all known wild plants from Tanzania, Uganda, and Kenya, the project received contributions from many botanists. Work began in the 1940s and was completed in 2012. Containing over 12,000 entries, it documents between 3 and 4 percent of known plant species in the world.

Flora of Tropical East Africa, Global Plants on JSTOR

The Flora of Tropical East Africa (FTEA) is a catalogue of all 12,104 known wild plant species in Uganda, Kenya, and Tanzania. The project began in 1948 and was finally completed in September 2012. Approximately 1,500 new plant species were described, by 135 botanists from 21 countries.
