## **DOWNHOLE GEOPHYSICAL LOGGING | Annual Review of Earth and ...**

Well logging, also known as borehole logging is the practice of making a detailed record (a well log) of the geologic formations penetrated by a borehole. The log may be based either on visual inspection of samples brought to the surface (geological logs) or on physical measurements made by instruments lowered into the hole (geophysical logs). Some types of geophysical well logs can be done during any phase of a well's history: drilling, completing, producing, or abandoning.

Geophysical Log Category — Log Types and Codes. Geophysical Logs in the PDMS are logs that portray rock properties measured with wireline logging tools.. In the PDMS, Geophysical Logs are divided into groups of similar Log Types as shown in the table below. The Log Code is used internally by the IGS to organize digital log files and is not an individual data field in the Log Info Subtable.
