Climate change is a topic that can be used to engage students in a variety of courses and disciplines. Through an NSF-funded project, we have written a set of in-class POGIL (Process Oriented Guided Inquiry Learning) activities that use climate change topics to teach general chemistry concepts. POGIL is a pedagogical approach that uses group activities to teach content and process skills.

Atmosphere & Greenhouse Gases. The natural greenhouse effect is necessary for the temperature of earth to support current life systems. The enhanced greenhouse effect caused by a greater buildup of carbon dioxide and methane (and other greenhouse gases) leads to less radiated heat leaving the atmosphere, resulting in warmer global temperatures.
