Histological and histopathological evaluation of the testis

The histopathological examination of the primary tumor should include, besides the histopathological type, the degree of tumor differentiation, the degree of peritumoral inflammatory infiltrate, vascular invasion and perineural invasion .

Clinical, Histological and Immunohistochemical Evaluation ...

Introduction: Invasive ductal carcinoma (IDC) is the most common type of breast cancer in women and accounts for about 80% of all breast cancers.

Material and methods: The material consisted of histological preparations derived from 691 patients treated for IDC-NST. Results: In our own study material, invasive ductal breast cancer of no special type accounted for more than 60% of cases, with ...

Retrospective evaluation of histopathological examinations ...

The power of using histological findings to guide the aetiology, evaluation, and ultimately targeted therapy is perhaps seen best through one of our VEO-IBD patients, who ultimately had a variant identified through WES, in ZBTB24. This monogenic defect has been shown to be causative for immunodeficiency, centromere instability, and facial ...

Distinct Histopathological Features at Diagnosis of Very ...

Histopathology refers to the microscopic examination of tissue in order to study the manifestations of disease. Specifically, in clinical medicine, histopathology refers to the examination of a biopsy or surgical specimen by a pathologist, after the specimen has been processed and histological sections have been placed onto glass slides. In contrast, cytopathology examines free cells or tissue micro-fragments.

Histopathology - Wikipedia

Abstract and Figures Histopathological evaluation provides one of the most sensitive end points for detecting the effects of toxicants on the testis, and is used routinely in the assessment of male...

(PDF) Histological Methods for the Evaluation of the Testis

Successful histopathological analysis of biopsies by chemical staining (hematoxylin, eosin) and antibody binding (PIN-4, in prostate) showed cellular architecture and immunoreactivity were retained. Concurrent metabolite extraction and histological analysis of intact biopsies is amenable to the clinical workflow.

Cancer detection and biopsy classification using ...

In this review, we focus on the histopathological features of GI-NENs, particularly regarding biopsy and cytological diagnoses, neuroendocrine markers, genetic and molecular features, and the evaluation of the Ki-67 index and mitotic count. In addition, we will address the histological features of GI-NEN in specific organs.
