Lower output capacity. Because of the smaller pickup of a round baler and the need to stop when tying a bale, production rate with a mini round baler will only be about 1/3 to ½ what is possible with a square baler. Marketability. If you sell hay, you may find that your customers, who are accustomed to square balers, will not like the round bales.

Buyer's Guide to Hay Equipment | Small Farm Sustainability

For example, a 50 hp (37 kW) intensifier pump will typically only put 30 hp (22 kW) to the nozzle, while a 30 hp (22 kW) crankshaft pump will put 28 hp (21 kW) to the nozzle. Examine the price and maintenance differences between the two types of pumps, and the lower horsepower pump quickly starts to look like the better choice:
