Cost is an obvious and critical element in implementing and maintaining an Infusion Team. The Infusion Team must be established as an important and essential asset to the healthcare organization. It must be well-managed, have documented advantages, provide cost-effective services, thereby increasing revenues, and improve patient care outcomes. Infusion Teams also take on a number of responsibilities beyond basic venipuncture.

The CDC guidelines state that a dedicated infusion therapy team can reduce the incidence of catheter-related infections and other complications and can lower the costs of therapy. Toward that end, the Infusion Nurses Society recently released an implementation module to help hospitals develop an infusion therapy team. The techniques include role discussions among team members, data collection processes, and financial considerations.
