### **Learning Strabismus Surgery A Case**

This type of learning (i.e. case-based approach) is perfectly suited to strabismus surgery. Strabismus surgery is not always straight-forward and one often has to rely on feel and intuition. This book provides a glimpse into how two expert strabismus surgeons think, evaluate a given clinical scenario, and anticipate surgical outcomes.

Consequently, adult strabismus surgery should not be considered merely cosmetic in most cases. In esotropic patients, this improvement typically takes the form of an expansion of binocular visual fields; however, some patients may also regain stereopsis. There are many psychosocial benefits to adult strabismus surgery.

A young girl with constant exotropia was planned for surgery. Thorough preoperative workup was done and the patient underwent strabismus surgery. The girl developed preseptal haematoma on the third postoperative day with marked chemosis and oozing of blood from the conjunctival cul-de-sac. A history of factor XIII (FXIII) deficiency was later revealed by the caretakers.

In several studies it has been recognized that surgery to correct strabismus can have the effect of improving binocular function. [28] [29] One of these studies, published in 2003, explicitly concluded: "We found that improvement in binocularity, including stereopsis, can be obtained in a substantial portion of adults."
