Accurate understanding of the global spread of emerging viruses is critically important for public health responses and for anticipating and preventing future outbreaks. Here, we elucidate when, where and how the earliest sustained SARS-CoV-2 transmission networks became established in Europe and North America. Our results suggest that rapid early interventions successfully prevented early ...

Introduction. Invasion ecology is a fast expanding ecological discipline, with the number of articles

on the subject having grown exponentially since the early 1990s (Lockwood et al., 2007). This expansion has resulted in considerable advances in our knowledge and understanding of the invasion process (Kolar & Lodge, 2001; Blackburn et al., 2009a; Davis, 2009).

Calorie restriction extends health span, which is thought to be mediated in part through a decrease in core body temperature. Guijas et al. compared metabolomics data from mice subjected to calorie restriction and that were housed at a temperature lower than body temperature or at thermoneutrality, reasoning that thermoneutrality would offset the metabolic changes induced by calorie restriction.
