A Dahlander motor rated 2 hp at high speed is rated 1 hp at half speed, that is- same torque, half RPM. A Dahlander motor on high speed fed with a VFD will develop the same torque at half speed set on the VFD, the same half hp as you get when you switch the motor run on a normal line.

are a Dahlander 2 speed motor and a vfd compatible?

I guess this is a Dahlander motor? This motor flips all the windings to the same polarity, north for example, to create set of south fields in between the the windings. So the rotor sees twice as many fields as there are actual windings and the result is half speed.

Read Book Manual Motor Dahlander Dahlander motor refers to a specific set of optional connections to the main stator winding. These are done OUTSIDE the motor frame (or at least within the main terminal box). This gives a single pole count for the motor, and the VFD can effectively control the machine as if it were not capable of multiple connections. How
