Daikin McQuay Type WGZ water chillers are designed for indoor installations Equipment room temperature for operating and standby conditions is 40°F to 122°F (4.4°C to 50°C). They are available with water-cooled condensers (Model DW), or arranged for use with remote air-cooled or evaporative condensers (Model DA).

### **Water-Cooled Scroll Compressor Chillers**

Chillers make cold water or water/glycol fluid mixture in order to cool buildings or processes. Often used in conjunction with coils in air handlers, chillers receive warm fluid from the air handler coil or process load, lower the temperature of the fluid, then a pump returns the fluid to the air handler coil or process.

Heat Pump Water Heater. Templifier heat pump water heaters are designed to economically turn waste heat into useful heat.

# Online Library Mcquay Chiller Service Manual

## Model Ags450de

Waste heat is extracted from a fluid stream by cooling it in the evaporator, the compressor amplifies the temperature of the heat and the condenser delivers the now useful heat to heating loads such as space heating, domestic hot water heating and process loads.

### **Templifier | Scroll Water Heater | Daikin Applied**

The single compressor centrifugal chiller features positive pressure design with R-134a refrigerant which has no ozone depletion potential and no phase-out schedule. Controls Flexibility MicroTech II® controls with our Open Choices® feature allow easy integration with your BAS of choice using LonWorks®, BACnet® or Modbus® communication.
