Furthermore, participatory design is called for because users need to have a sense of ownership in order to make better use of the technology. Workers who can exercise certain control over their work tend to be more motivated and develop more efficient and effective work practices.

8. Participatory Design

Participatory Design (PD) is a design methodology in which the future users of a design participate as co-designers in the design process. It is a value-centered design approach because of its...

(PDF) Participatory Design and Design for Values

Participatory design (originally co-operative design, now often co-design) is an approach to design attempting to actively involve all stakeholders (e.g. employees, partners, customers, citizens, end users) in the design process to help ensure the result meets their needs and is usable. Participatory design is an approach which is focused on processes and procedures of design and is not a design style.

Participatory design - Wikipedia

Participatory Design in Practice. As organizations embrace design-led innovation, they can struggle to reap the full value of human-centered design. A design team's interactions with customers may often be limited to only the early research and late evaluation phases of the design process, while the work in between - when ideas are being generated - is left to the internal team alone.

Participatory Design in Practice | UX Magazine

Participatory design is a democratic process for design (social and technological) of systems involving human work, based on the argument that users should be involved in designs they will be using, and that all stakeholders, including and especially users, have equal input into interaction design (Muller & Kuhn, 1993).

Participatory Design | Guide books

Secondly, three principles distinguishing Scandinavian participatory design are discussed: democracy and democratisation, values in design, and conflict as a resource in design. Finally, two works in progress are described, as they suggest possibilities for practising participatory design in contexts outside of Scandinavia.
