Principles Of Magic T Theory

These Ts illustrate the basic principle of Magic T Theory that when the market has made an important bottom it will rally only as many months as it had previously declined. For example, the first T centered in 1957 states that after a 20-month decline the next advance will last a matching 20 months, terminating at the T's right end.

race coupler. In contrast to the rat-race, the three-dimensional structure of the magic tee makes it less readily constructed in planar technologies such as microstrip or stripline. The magic comes from the way it prevents signals from propagating between certain ports under specific conditions. This allows it to be used as a duplexer; for instance, it can be used to isolate the transmitter and rec

#2 The Magic T Indicator. Here we don't want to explicitly talk about the indicator itself (just google Terry Laundry T Theory) , but about the underlying price principles that the indicator is built upon. At its core, the T theory states that the markets spend the same amount of time going up and down. Hence, it refers to a 'T' because the two lines, left and right to to center line, are equally long.

A magic tee is a four-port, 180 degree hybrid power divider, realized in waveguide. Originally developed in World-War II, and first published by W. A. Tyrell in a 1947 IRE paper, it has very similar properties to the rat-race coupler, which is usually realized in microstrip or stripline. Like all of the coupler and splitter structures, the magic tee can be used as a power combiner, or a divider.

In Indian and Chinese magic the principles are related to conceptual systems of their own which are still not very well understood by Westerners. But some insight into the actual practices of magic, East and West, as well as the magical practices of many primitive societies, can be gained without intimate knowledge of the above conceptual systems, although reference to some concepts, entities, and forces is necessary.

In terms of its value as a magical theory, the spiritist paradigm has very little real explanatory or predictive power. We all know what 'the spirit realm' means, it means whatever the spiritist wants it to mean. In other words it has fantastically complicated and more or less arbitrary and variable properties.
