In the same paper, Mednick proposed a tool to test people's ability to do just that: the Remote Associates Test, or RAT, a word puzzle that requires the solver to link three different words using a fourth. For example: What do words "top," "multiplication," and "dinner" have in common?

Test Your Creativity With This Word Puzzle -- Science of Us

Remote Associates Tests (RAT) Remote Associates Tests are my favorite because they are more like puzzles instead of open-ended tests which are difficult to gauge. The concept is simple: you are given 3 seemingly unrelated words, such as "falling , actor , dust", and you are asked to come up with a fourth word that connects all 3 words.

The Remote Associates Test (RAT) is a widely used measure in creativity research. The RAT was developed by Mednick (1962) to empirically test his associative theory of creativity. According to the theory, creative individuals are better at making remote associations in comparison to non-creative (Mednick, 1962). The originally proposed version of the RAT is to find a solution word for three stimuli words.
