The evolution of Smart Cities is, in many ways, directly tied to the evolution of MIFARE ®, NXP's brand for contactless solutions. First deployed in 1994, MIFARE ICs were originally developed for automated fare collection in public transport, but that was just the beginning. Since then, MIFARE enables contactless transit, payment, and access experiences for citizens, independent of location ...

## **MIFARE**

Summary Some security experts fear contactless card technology, which uses radio-frequency identification (RFID), opens consumers up to a whole new form of identity theft. As a result, several retailers sell RFID-blocking wallets, claiming they can keep your card information safe from fraudsters with sophisticated card readers.
