Create purchase order (customer's ERP system, SAP R/3 4.6C or higher, with or without DIMP) The customer creates a purchase order in the ERP system. The ERP system transfers the ORDERS.ORDERS05IDoc to the customer's SAP NetWeaver system. The SAP NetWeaver system converts the IDoc into an XML message of type ReplenishmentOrderNotification(ROn), and transfers it to SAP SNC.

That partner has to be EDI enabled in that system. SAP should realize that it could send doc to this vendor electronically. The PO sent as an outbound idoc by the customer will be inbound idoc for the vendor. The SAP system on the vendor's side can process this to create an application document (a sales order) on their system.
