Sexuality and disability is regarding the sexual behavior and practices of individuals with disabilities. Individuals with disabilities have a range of sexual desires and differ in the ways they choose to express their sexuality. Commonly, people with disabilities lack comprehensive sex education that would assist in their sexual lives. This roots from the idea that people with disabilities are asexual in nature and are not sexually active. Although some people with disabilities are asexual, it

The difference however for disabled people is that no one seems to want to talk about sex and disability. Targeted relationships and sex education for young disabled people is practically non-existent. Support for couples coming to terms with disability and the impact it has on their relationship is thin on the ground. We talk to disabled people every day who are struggling to access basic sexual health services, such as STI screening.
