stopping on a dime lab - Santa vs. Zombies

Then everyone in the group was timed running a 25 meter course in addition to measuring the distance each runner overshot the finish line. After an involved discussion about the challenges of safe design in general, the kids decided that it makes the most sense to consider the slowest reaction time, the fastest speed, and the longest overshoot in order to come up with the safest estimate for the distance between the out-of-bounds line and other obstructions.
