The Climate Nexus: Water, Food, Energy and Biodiversity: O ...

Water, energy and food. Describing water, energy and food as a nexus gathered momentum in the late 2000s in response to greater recognition of the need to promote broader-ranging and cross-sectoral approaches in natural resource decision-making. Important early publications includes a World Economic Forum report entitled "Water Security: The Water-Food-Energy Climate Nexus" and as a background paper to a major conference on the nexus in Bonn 2011 called "Understanding the Nexus".

Understanding the Water-Energy-Food Nexus in a Warming Climate

As an important step toward the understanding of the water-food-energy-climate nexus, the World Economic Forum Water Initiative helped publish this book, which collects perspectives on the common water challenges we share from government leaders, religious groups, business, non-governmental organizations, academics, entrepreneurs, financial experts, journalists, trade specialists, and many others.

Climate and southern Africa's water-energy-food nexus ...

The water, energy and food security nexus according to the Food And Agriculture Organisation of the United Nations, means that water security, energy security and food security are very much linked to one another, meaning that the actions in any one particular area often can have effects in one or both of the other areas. These three sectors are necessary for the benefit of human well-being, poverty reduction and sustainable development. As the world population is nearing 8 billion, increasing d

Water, energy and food security nexus - Wikipedia

Secure supplies of water, food and energy are essential to human dignity and well-being around the globe. In turn, the vitality of these three depends on a thriving biodiversity supported by healthy ecosystems. The complex interdependence among these four factors is known as the Nexus. Global demand for the first three elements is increasing due to population growth and rising per capita incomes in developing countries, with steadily worsening consequences for the fourth of these elements.
