The Cosmic Century A History

Cosmology is one area where tracing the history of our understanding seems to coincide with an excellent approach to studying the topic itself. It is amazing how "right on" the scientists of the past few centuries were in their ideas about the universe - recent refinements being the result of vast advances in instrumentation and measurement in the most recent decades.

The Cosmic Century : A History of Astrophysics and ...

During the 17th century, natural philosophers such as Galileo, Descartes, and Newton began to maintain that the celestial and terrestrial regions were made of similar kinds of material and were subject to the same natural laws. Their challenge was that the tools had not yet been invented with which to prove these assertions.

Per Carlson, in his article “A century of cosmic rays” (Physics Today, February 2012, page 30), states that the investigation of cosmic rays opened up the field of particle physics. However, he neglects the importance of nuclear emulsions in the progress of particle physics, and he fails to mention a key figure, Austrian physicist Marietta Blau (1894–1970), who pioneered the development ...
