A longbow is a type of bow that is tall - roughly equal to the height of the user - allowing the archer a fairly long draw. A longbow is not significantly recurved . Its limbs are relatively narrow so that they are circular or D-shaped in cross section.

## **Longbow - Wikipedia**

The long bow was about six feet long and made from a yew tree.

## Read Free The Longbow

However, a shortage of yew trees meant that ash, elm or wych elm were also used. The arrows for this weapon were three feet long with broad tips when used against infantry when their armour needed to be pierced and narrow tips to pierce the plate armour used by knights.
