The Moral Landscape: How Science Can Determine Human ...

The Moral Landscape: How Science Can Determine Human Values is a 2010 book by Sam Harris, in which the author promotes a science of morality and argues that many thinkers have long confused the relationship between morality, facts, and science. He aims to carve a third path between secularists who say morality is subjective, and religionists who say that morality is given by God and scripture. Harris contends that the only moral framework worth talking about is one where "morally good" things pe

THE MORAL LANDSCAPE

Because there are definite facts to be known about where we fall on this landscape, Harris foresees a time when science will no longer limit itself to merely describing what people do in the name of “morality”; in principle, science should be able to tell us what we ought to do to live the best lives possible.

The Moral Landscape | Sam Harris

In *The Moral Landscape*, Sam Harris (2010) proposes that science can be used to identify values, which he defines as “facts that can be scientifically understood: regarding positive and negative social emotions, retributive impulses, the effects of specific laws and social institutions on human relationships, the neurophysiology of happiness and suffering, etc.” (pp. 1-2).
