Technologies are recursive in nature, just like the fractal - technologies within technologies, all the way down to the elemental parts and up to large societal systems. When you look inside a piece of technology, its components are changing all the time. That's one of the main benefits of modularity.

Nature and technology are sometimes classified as binary opposites, they are different yet they both play a huge part in our lives. These being binary opposites can be argued because they work hand in hand daily for humans to live. Without technology there is no life, and without nature there is no technology and no life.

In 2009, Arthur  
published The Nature  
of Technology: What it  
Is and How it Evolves.  
The book argues that  
technology, like  
biological life, evolves  
from earlier forms. But  
the main mechanism  
isn't Darwin's, it is the  
combining of earlier  
technologies—earlier  
forms. The book
