## **7 best practices for securing your cloud service | CSO Online**

Cloud computing is based on delivery of abstracted services that often closely resemble existing hardware, networks, and applications. It is critical for effective security, however, that consumers realize these are only abstractions carefully constructed to resemble information technology resources organizations currently use.

## **Best Practices for Cloud Security**

With cloud-based systems, patient information is not kept within the practice itself, so theft of information is much less likely. In addition, cloud-based servers often encrypt their data so that if anything is stolen, it cannot be easily decipherable.
