The Prehistory Of Mind Cognitive

What can the sexual habits of chimpanzees tell us about the prehistory of the modern mind? This is the first archaeological account to support the new modular concept of the mind. The concept, promulgated by cognitive and evolutionary psychologists, views the mind as a collection of specialized intelligences or "cognitive domains," somewhat like a Swiss army knife with its specialized blades and tools.

The Prehistory of the Mind: The Cognitive Origins of Art ...

The Prehistory of the Mind is sweeping in its scope, synthesizing material from a whole array of fields from biology to psychology, and (of course) archaeology. Unlike your average work of evolutionary psychology, Mithen's account is heavily informed by his background in archaeology and the paleoarchaeological record.

The Prehistory of the Mind: The Cognitive Origins of Art ...

At first blush, the idea of creating an archeology of the human mind seems improbable, but Mithen actually makes compelling reading. Mithen isolates specific mental skills that most probably were used by our ancestors and traces there modifications and eventual integration to form the modern human brain. The reader does not have to buy into the specific developmental theory of the book in order ...

What can the sexual habits of chimpanzees tell us about the prehistory of the modern mind? This is the first archaeological account to support the new modular concept of the mind. The concept, promulgated by cognitive and evolutionary psychologists, views the mind as a collection of specialized intelligences or "cognitive domains," somewhat like a Swiss army knife with its specialized blades and tools.

The Prehistory of the Mind: The Cognitive Origins of ...

A scientific theory of mind requires, it now appears, ideas from fields as diverse as computation, evolution, neurobiology, and physics. The Prehistory of Cognitive Science admirably explores many central ideas in contemporary cognitive science, and provides an illuminating historical context in which to better understand the provenance of current conceptions and debates.

prehistory bears a marked resemblance to the evolution of the mental cathedral during the childhood of a contemporary person. The mind of an infant or of a Neanderthal is, in Mithen's view, Romanesque; the mind of an adult Homo sapiens sapiens, in contrast, a veritable Chartres. In his view, ontogeny
