Relay Testing Training for Relay Testers by Relay Testers

...

End-to-end testing is considered to be the ultimate test for protective relay protection schemes with two or more relays who communicate trip and blocking information with each other. These schemes are designed to provide more accurate fault detection to more quickly isolate faults from the rest of the electrical system.

End-to-End Testing

The first electrical test made on the relay should be a pickup test. Pickup is defined as that value of current or voltage which will just close the relay contacts from the 0.5 time-dial position. Allowing for meter differences, interpretation of readings, etc., this value should be within $\pm 5\%$ of previous data.
