There is the idiom the more things change, the more they stay the same. Many things remain consistent even as changes happen. The phrase is often said in a resigned or sarcastic tone. We move into a fancy new office, and still, the server crashes all the time. The more things change, the more they stay the same.

single word requests - "different but same" - English ...

The Fortran API functions do not use pointers, they use an integer that is the same size as a pointer (mwPointer) to hold the pointer value. So for Fortran, there is NO difference between mxGetPr and mxGetData ... they both return exactly the same thing. Namely, an integer that holds the address of the first element of the data block.

Same Same But Different? mxGetPr and mxGetData... - MATLAB ...

I am calculating a certain value X on a calculator, and the order in which I do the calculation yields different answers. Can someone enlighten me please, as to why this is the case ? CASE 1: $X = (730 * 4800)/1024 = 3421$. CASE 2: $X = 730 * (4800/1024) = 2920$. CASE 1 is actually closer to the desired result.
