The Center Of Light

Sound is measured from the ten's to the ten of thousand's of cycles per second. Light manifests as billions of cycles per second. Therefore, one way of viewing the relationship between sound and light is to assume that light is speeded up sound, or conversely, that sound is slowed down light.

The Sound of Light - Sound Healers Association

Sound and light travel at significantly different speeds. Light waves move at speeds that are nearly one million times faster than sound waves are capable of traveling. Light waves are capable of moving through empty space at speeds of around 186,000 miles (or 299,792,458 meters) per second.

After three years of waiting for another novel from this very talented author, she has finally released a new novel, The Sound Of Light. The Sound Of Light is completely different than her previous novels and has a completely different kind tone. Where her first novels had a dark undertone, The Sound Of Light has a bright, positive quality that shines brightly through the words on the pages. The readers will become enamored with K'acy McGee because of her inner beauty.
