In finance, a trading strategy is a fixed plan that is designed to achieve a profitable return by going long or short in markets. The main reasons that a properly researched trading strategy helps are its verifiability, quantifiability, consistency, and objectivity. For every trading strategy one needs to define assets to trade, entry/exit points and money management rules.

Trading support and resistance is a core method for me. If a stock, futures contract, or currency pair does not show good adherence to principles of support (doesn't want to go below a certain price without a fight) and resistance (price levels that are somewhat hard to get through) then I am not interested in trading it.
