Caterpillar 3412 diesel fuel injection pump

For this problem, you have to check some places on the engine to find out the problem and those are, First find out that, is there any low pressure from the fuel tank to the fuel injection pump. It should have 3 to 7 PSI pressure from the fuel injector to lift the pump.

Caterpillar Diesel Engine Generator Troubleshooting ...

Take the unloader apart and inspect the piston valve assembly. Look for evidence of wear and lack of movement. Repair and clean as indicated or replace internal piston.

Pressure Washer Troubleshooting | Cat Pumps

Check for the engine to crank. If it cranks but does not start, the likely problem can be narrowed down to the fuel pump, wiring circuit or pump relay. Bad injector relays could also be the cause. Check to see if the fuel pump runs when cranked; if so, the problem lies in the injectors themselves.

How to Diagnose Fuel Injector Problems | It Still Runs

As a general rule of thumb, a 7.3L injector will last 200,000 miles without skipping a beat, although we've seen them go 250,000 to 350,000 before an overhaul was typically necessary. Even though the 6.0L is notorious for injector problems, a properly maintained set can last at least 150,000 miles. 7.
