Physics Study Guides. I have prepared a set of very complete solutions to physics problems taken from popular textbooks for calculus-based physics. They are all in PDF format, so you need to have the Acrobat Reader installed on your machine (it is free... go get it!) This is an ongoing project; some chapters are missing some important material.

measurement.

Measurements are made by comparisons to well-defined standards which define the units for our measurements. The SI system (popularly known as the metric system) is the one used in physics. Its unit of length is the meter, its unit of time is the second and its unit of mass is the kilogram.

Vectors: Tools for Physics

In the international system of measurement (S.I.) the second (s) is the basic unit of time and it is defined as the time it takes a cesium (Cs) atom to perform 9,192,631,770 complete oscillations. The Earth revolves around its own axis in 86400 seconds with respect to the Sun; this is known as 1 day, and
