With the macroeconomic data about these countries for 1995-2020 collected from the World Bank's Worldwide Development Indicators (WDI) and Global Development Finance (GDF) as well as Siemens's data, the Current Market Index (CMI) of these countries from 1995 to 2010 and their Market Dynamic Index (MDI) from 2011 to 2020 are calculated and the sum of the two is the Total Index of a Country Model. Based on an analysis of the 58 countries' Total Index of a Country Model, Siemens divides ...

**Macroeconomic Data - an overview | ScienceDirect Topics**  
Macroeconomic analysis focuses on national economies (or in the case of the Eurozone on the euro area) and examines their health. This is done by interpreting the economic indicators for the following areas: growth (business climate, GDP), inflation (consumer price index, producer price index), employment (unemployment claims, jobless claims) and production (factory orders, building permits).

**Economic Indicators - Charts and Data | MacroTrends**  
Economic data issues. Good economic data are a precondition to effective macroeconomic management. With the complexity of modern economies and the lags inherent in macroeconomic policy instruments, a country must have the capacity to promptly identify any adverse trends in its economy and to apply the appropriate corrective measure. This cannot be done without economic data that is complete, accurate and timely.
