Bring your own device (BYOD): VDI is an ideal solution for environments that allow or require employees to use their own devices. Since processing is done on a centralized server, VDI allows the use of a wider range of devices. It also offers better security, since data lives on the server and is not retained on the

Security - VMware

The VMware Horizon VDI solution provides greater flexibility and security than terminal services, because user data is stored on virtualized servers that can be managed, updated, and backed up centrally. Users can connect to virtual desktops through personal computers (PCs), tablet PCs, smartphones, thin clients, or zero clients.
