Lev Vygotsky (1896 -1934) was a Soviet psychologist who researched children's learning in social and cultural contexts. In particular, his theory of 'social constructivism' discussed the importance of social interactions in children's cognitive development. Vygotsky was also very interested in creativity and imagination how these were understood in education.

Vygotsky on collective creativity - Art. Play. Children ...

To Vygotsky, this brings to the fore the issue of the link between reality and imagination, and he discusses the issue of reproduction and creativity, both of which relate to the entire scope of human activity. Interpretations of Vygotsky in the 1990s have stressed the role of literature and the development of a cultural approach to psychology and education. It has been overlooked that Vygotsky started his career with work on the psychology of art.

Vygotsky's Theory of Creativity: Creativity Research ...

The work of Lev Vygotsky (1934) has become the foundation of much research and theory in cognitive development over the past several decades, particularly of what has become known as sociocultural theory. Sociocultural theory views human development as a socially mediated process in which children acquire their cultural values, beliefs, and problem-solving strategies through collaborative dialogues with more knowledgeable members of society.
